

Advanced Training Course ATC5

Multisensory integration in the context of active touch

04/05/2021 13h-14h	Benoît Delhaye (UCLouvain) An introduction to the human somatosensory system
05/05/2021 13h-14h	David Gueorguiev (ISIR, UPMC; UCLouvain) Psychophysics and biomechanics of dynamic touch
06/05/2021 13h-14h	Anaïs Grégoire (UCLouvain) An introduction to the human auditory system
12/05/2021 17h-18h	Valérie Goffaux, Michael Andres & Gilles Vannuscorps (UCLouvain) Ventral and dorsal streams of the human visual system
14/05/2021 13h-14h	André Mouraux & Giulia Esposito (UCLouvain) EEG to explore multisensory integration in the context of dynamic touch
17/05/2021 13h-14h	Valéry Legrain & Lieve Filbrich (UCLouvain) Spatial perception of touch and multisensory interactions in space
18/05/2021 13h-14h	Frédéric Crevecoeur (UCLouvain) Contribution of touch in motor control
19/05/2021 17h-18h	Olivier Collignon & Iqra Shahzad (UCLouvain) New date Mapping multisensory representations in the human brain using fMRI
20/05/2021 13h-14h	Marc Ernst (Ulm University) Getting in touch with multisensory integration
25/05/2021 13h-14h	Tomas Lenc (UCLouvain) Sensorimotor integration in the context of rhythmic movements
26/05/2021 17h-18h	Michael Hove (Fitchburg State University) Vibrotactile-auditory interactions and bass in music perception
